SmartCleaner

Powered by

Increase efficiencies,
reduce labor costs.

**Regional
Distributors, Inc.**

Remotely manage workforce and task completion across multiple locations to utilize staff and resources efficiently.

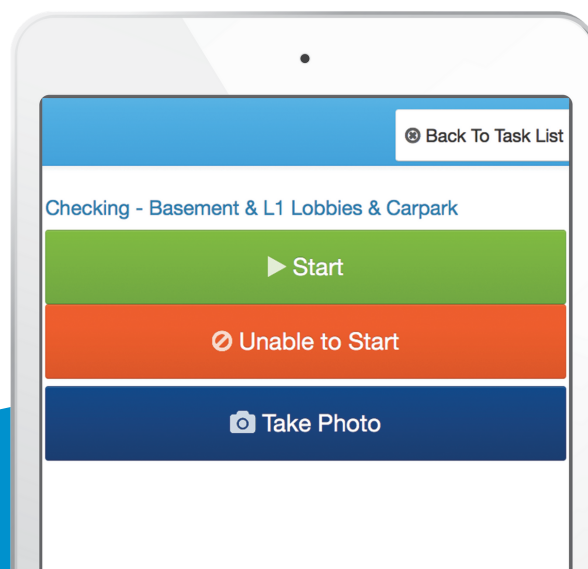

SmartCleaner is the complete software application specially designed for commercial cleaning organizations with cleaning staff. Supervisors assign pre-set schedules to the required staff and track the progress of these schedules to ensure tasks are completed in a timely manner.

Employees log when tasks have been completed and report any issues via SmartCleaner, which is automatically sent to the supervisor. Managers have the ability to monitor staff efficiencies via the intuitive Dashboard. This data can then be used for greater staff utilization in order to cut labor costs and determine forecasts for future contracts.

SmartCleaner

- ✓ Real-time staff scheduling, tracking and task assignment to remote staff
- ✓ Automates schedules & task completion
- ✓ Eliminates timesheet fraud
- ✓ Provides accurate task duration times
- ✓ Automates audits
- ✓ Captures photos of work (before & after)
Generates metrics & reports
- ✓ SMS notifications for incomplete work, facility issues & absenteeism
- ✓ Live dashboard of site completion & daily progress

Case Study: University of Rochester Medical Center

Key Impacts

- Scheduling methodology saved 2 hours in travel time per floor per day
- 1 hour/day gained in each staff member's productivity = 48 hours/day across workforce
- \$325,000+ year in staff labor savings
- 45% decrease in troubleshooting and customer complaints
- Automated collection of documentation and daily events for compliance
- Empowered staff, increased performance and personal accountability
- ROI in less than 5 months, including start-up costs

"With Virtual Manager we have seen a return on investment within 4-5 months, with that being extremely conservative. It is almost impossible to add up all the efficiencies that this can bring to an organization. There is no other product out there that can do everything that this product can do. It is easy to use, supports management and supports senior leadership with the reports that are provided. It's a winner!"

Mark Schwartz - Director of Operations
University of Rochester Medical Center
